Examiner's Statement of Reasons for Allowance

1. Claims 1-27 are allowed.

2. The following is an examiner's statement of reasons for allowance:

The prior art made of record fails to anticipate or make obvious the claimed invention. Specifically, the prior art fails to teach, in combination with the remaining elements as recited in claims 1, 12, 26, and 27:

The present invention is directed to an image display device for receiving an input image data comprising three or more color data, and displaying the input image data on an image display unit.

Claims 1-11 are identified the uniquely distinct feature "conversion characteristics setting means for calculating the conversion characteristics data on the basis of the conversion characteristics designation data, and setting the conversion characteristics data in the conversion characteristics storage; wherein said conversion characteristics designation means comprises: chroma designation means for a user to designate the chroma of the color represented by the second image data comprising three or more colors".

Claims 12-25 are identified the uniquely distinct feature "conversion characteristics setting means for calculating the conversion characteristics data on the basis of the conversion characteristics designation data, and setting the conversion characteristics data in the conversion characteristics storage; wherein said conversion characteristics designation means comprises: chroma designation means for a user to

Art Unit: 2821

designate the chroma of the color represented by the second image data comprising three or more colors".

Claim 26 is identified the uniquely distinct feature "a color converter for converting chroma of the color components of the first image based on the adjustment value, without substantially effecting another one of said six color components, thereby generating a second color data, which represents the second color image".

Claim 27 is identified the uniquely distinct feature "a color converter for converting chroma of only one of the color components of the first image based on the adjustment value, thereby generating a second color data, which represents the second color image".

The prior arts fail to anticipate or render the above underline limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
